(54) Title: CATALYTIC ASYMMETRIC SYNTHESIS OF OPTICALLY ACTIVE α -HALO-CARBONYL COMPOUNDS

(57) Abstract: A process for the catalytic asymmetric synthesis of an optically active compound of the formula (1a) or (1b): wherein R is an organic group; X is halogen; R₁ and R₂ which may be the same or different represents H, or an organic group or R₁ and R₂ may be bridged together forming part of a ring system; R and R₂ may be bridged together forming part of a ring system; with the proviso that R and R₁ are different and R₂, when different from H, is attached through a carbon-carbon bond, comprising the step of reacting a compound of the formula (2): with a halogenation agent in the presence of a catalytic amount of a chiral nitrogen containing organic compound.
